Tether USD (USDT) – Whitepaper (Draft)

Token Name: Tether USD

Symbol: USDT

Contract Address: 0x91f5a9e80F645277F3AF233eacf5F27f53be3EB3

Total Supply: 25,000,000

■ Introduction

Tether USD (USDT) is a custom ERC-20 token created for testing purposes, focusing on price fetching and automatic token importing across platforms and wallets.

■ Tokenomics

- Total Supply: 25,000,000

- Decimals: 18

- Blockchain: Ethereum-compatible

- Contract: Public and verified

■■ Purpose & Use Case

The token is designed to test:

1. Price fetching on decentralized exchanges (DEX).

2. Automatic import features in wallets.

3. Liquidity pool integration experiments.

■ Roadmap

- Phase 1: Token deployment & liquidity addition.

- Phase 2: Website launch & whitepaper release.

- Phase 3: Submission to CoinMarketCap & CoinGecko.

- Phase 4: Integration with testing wallets and aggregators.

■■ Disclaimer

This token and whitepaper are for testing purposes only. It is not an investment and carries no intrinsic financial value.
